DOMAIN	RECORD	LENGTH
SS	STUDENT SUCCESS DATA RECORD	80
Reporting Domain		
<p>The following record layout indicates the format in which the districts report success information. Report a Student Success record for each credit and noncredit student who:</p> <ul style="list-style-type: none"> (1) enrolled in at least one class as of first census or later for daily or weekly census classes, or (2) attended at least one meeting of a positive attendance class, or (3) enrolled in at least one class that resulted in a notation on the student's official record, or (4) received pre-enrollment matriculation services. <p>You must submit a Student Basic record for each student reported. The services are to be reported in the term they were received.</p>		
<p>The file with these records is submitted approximately one month following the end of the term. This record is 80 characters long. The first two positions contain the record code 'SS'. The entire MIS submission will be rejected if the SS data file is not submitted.</p>		

DED#	DATA ELEMENT NAME	FORMAT
SS01	STUDENT-EDUCATIONAL-GOAL	X(01)
<p>This element describes the student's educational goal while enrolled in the reporting college and should be updated each term if the student notes a change during their academic career. This information is in addition to SB14 and is collected after that element has been recorded. The distinction between the elements is an important one: where SB14 records the <u>initial</u> goal of the student upon application, this element documents and confirms their current goal each term. After a student has reviewed assessment results, received orientation or other services which expand a student's understanding of the requirements necessary to achieve the goal, goal data is collected again and reported in STUDENT-SUCCESS-GOAL (SS01).</p>		
<p>Enter primary goal only.</p>
